DETAILED ACTION

1. Claims 1-13, 15-26, 28-30, 44-72 are allowed. These claims have been renumbered as claims 1-57.
2. Claims 14, 27, and 31-43 have been cancelled.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an interview with Maurice Pirio on June 27, 2007.

5. Claims 1, 21, 44, and 63 have been amended as follows:

1. (Currently Amended) A method in a computer system for generating a help file having topics, the method comprising:
 - collecting failed user queries;
 - collecting user queries that did not fail;
 - receiving a selection of a topic;

receiving a selection of some of the collected user queries; and
modifying the help file so that the selected topic is ~~more likely~~ identified as being
relevant to the selected user queries factoring in information derived from
a failure rate of the user queries[.];

wherein the failure rate of a user query represents a ratio of a number of
submissions of that user query that failed to the total number of
submissions of that user query.

21. (Currently Amended) A computer system for modifying a help file having
topics, comprising:

a component that collects failed user queries;
a component that selects some of the collected user queries; and
a component that modifies the help file based on the selected user queries so
that a selected topic is ~~more likely~~ identified when a selected user query is
submitted,

wherein a help file has an original language and the modified help file has a
different language and the selection of the collected user queries is
language-specific selects user queries that are in the different language.

44. (Currently Amended) A method in a computer system for generating a
help file having topics, the method comprising:

collecting failed user queries;
receiving a selection of a topic;
receiving a selection of some of the collected user queries; and

modifying the help file so that the selected topic is ~~more likely~~ identified as being relevant to the selected user queries

wherein a help file has an original language and the generated help file has a different language and the selection of the collected user queries ~~is different for different languages~~ selects user queries that are in the different language

63. (Currently Amended) A computer system for modifying a help file having topics, comprising:

a component that collects failed user queries and collects user queries that did not fail;

a component that selects some of the collected user queries; and

a component that modifies the help file based on the selected user queries and information derived from a failure rate of user queries so that a selected topic is ~~more likely~~ identified when a selected user query is submitted[.];

wherein the failure rate of a user query represents a ratio of a number of submissions of that user query that failed to the total number of submissions of that user query.

REASONS FOR ALLOWANCE

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements

Art Unit: 2167

including 'modifying the help file so that the selected topic is more likely identified as being relevant to the selected user queries factoring in information derived from a failure rate of the user queries; wherein the failure rate of a user query represents a ratio of a number of submissions of that user query that failed to the total number of submissions of that user query' as recited in independent claim 1 and similarly recited in independent claim 63.

As per claim 21, the prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including 'wherein a help file has an original language and the modified help file has a different language and the selection of the collected user queries selects user queries that are in the different language' and similarly recited in independent claim 44.

The remaining claims, 2-13, 15-20, 22-26, 28-30, 45-62, and 64-72 are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
